

The nimue product range was initially developed in 1994 aimed at the medical market for pre and post operative application as well as for advanced results orientated skin rejuvenation treatment by skin care therapists. Nimue has since evolved into a globally recognized brand, primarily amongst leading skin care salons for it's innovative formulations and cutting edge technology based on the effective combination of exceptional ingredients with scientifically proven delivery systems.

As a primary leader in the skin care industry Nimue are renowned for their expert understanding of the skin and the effective treatment of various skin conditions.

The treatment formulations deliver optimal concentrations of pharmaceutical grade nutrients, cutting edge antioxidants, superior quality phytochemicals, peptides and other powerful active ingredients where they are needed most - below the skin's surface to actively improve skin health and appearance.

Nimue is globally recognised for it's modern skin classification concept (Environmentally Damaged Skin, Hyperpigmented Skin, Problematic Skin and Interactive) and unique philosophy based on four treatment pillars, Rejuvenation, Restoration, Antioxidation and Sun Protection.

As a dynamic brand and trendsetting innovator Nimue continue to satisfy the ever demanding industry with their unique understanding, philosophy and concept.

Research and Development

Nimue Skin Technology occupies a leading position in the modern Skin Care Industry, as a result of continuous research based on the latest international scientific data and implementation thereof. This continuous upgrading is under direct supervision of Professor Aubrey Parsons and Dr Fernando Bouffard.

Professor Aubrey Parsons ranks amongst the top International Cosmetic Research Scientists. He is currently an Honorary Senior Researcher at the University of South-Africa, specialising in Botanical Extracts and related natural materials for the Skin Care and Nutraceutical industries. He serves on the editorial board of the International Society of Cosmetic Dermatology and lectures extensively at various academic institutes globally, which has resulted in two Honorary PhD's in Skin Care, Fragrance Chemistry as well as Plant Extracts, Phytochemicals and Essential Oils.

Dr. Bouffard has a PhD in pharmacology and has focused on developing and introducing rejuvenation skin treatment products to medical practitioners in more than 40 countries in the last decade. Through years of experience in medical science and cosmeceutical treatment products, he strives to meet the demands of the modern consumer and committed himself in providing Nimue skin care professionals with the most advanced and effective products to improve skin health and appearance.
